Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Tetzner. The device of Tetzner includes a base 16 mounted for rolling movement, a post 19, 20 extending upwardly from the base, a winch 55 mounted to the post and supporting means for a roll of material including a bed 25 and a tube 26 extending upwardly from the bed, the winch operatively connected to the roll supporting means through cable 61 attached to the roll supporting bed 25 at 62.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 4-5 are rejected under 35 U.S.C. 103(a) as being unpatentable over Tetzner.

Whether the post of Tetzner is extendible would have been an obvious design consideration to one of ordinary skill in the art in order to provide a greater vertical movement of the roll supporting means, or for knockdown purposes as one of ordinary skill in the art would readily have recognized, regarding claim 4. With respect to claim 5 it would have been obvious to one

Art Unit: 3654

of ordinary skill in the art to connect the cable 61 of Tetzner directly to the tube 26 rather than the bed inasmuch as the tube and bed are integral with each other and the roll support would be elevated by any attachment of the cable to any part of the roll support, whether the bed or tube.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tacchi et al, Huson et al '734 and '657, Usui and Bettenhausen are cited to show other roll supporting lifting devices.
